We help facilitate critical equipment for healthcare providers

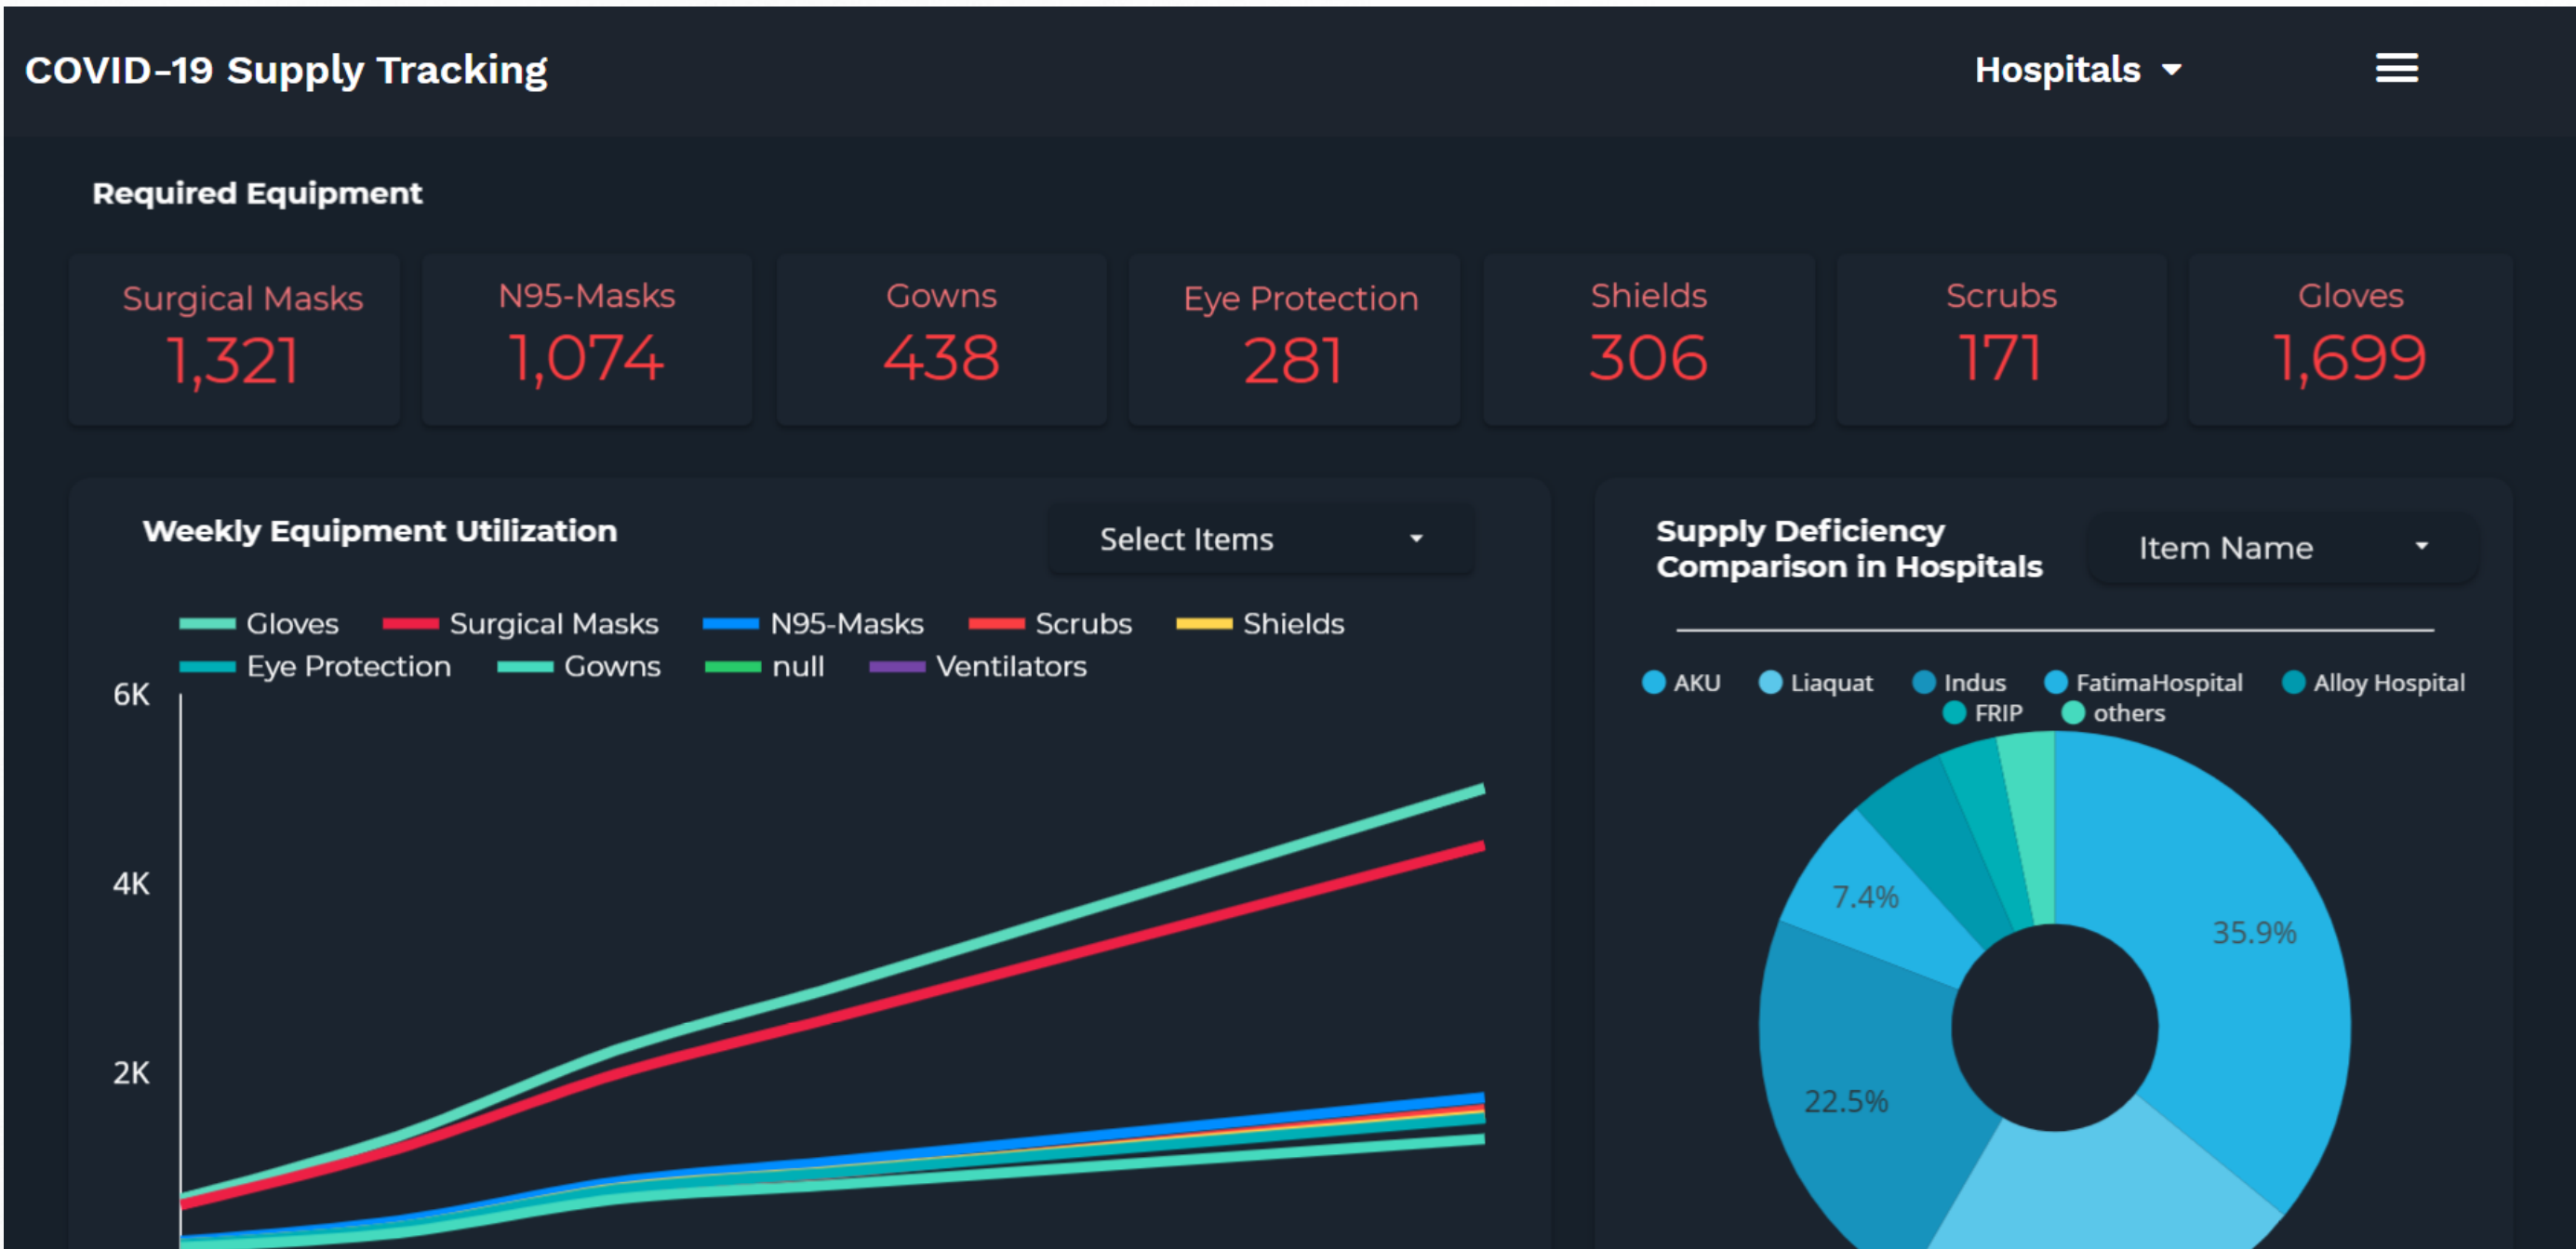

All hospitals, community-based organisations, and isolation centers are able to highlight their resource deficiency which helps in effective allocation of equipment.

DASHBOARD LOGIN

Strategy to Optimize The Availability of Personal Protective Equipment

- Minimize PPE Need
- Coordinate PPE Supply Chain
- Use PPE Appropriately

A platform aimed at facilitating supply chain optimization by tackling inadequate and inequitable resource distribution through a centralized management approach.

Through our portal, organizations in need of PPEs, ventilators, blood donations and other key resources can be connected to NGOs, government agencies and manufacturers that enables time-sensitive and need-based optimization of resource allocation and distribution.
